Sonia –

I spoke to both Greg Mills and the Chief today about my concerns;

- 1) The equipment is not able to be installed in the vehicles because we don't have the proper hardware, yet. I might be 8-18 months before we do.
- 2) The service agreement is free for the first two years, but our equipment will be in boxes for a significant period of time before we ever install it.
- 3) The warranty on the hardware is good for one year from date of purchase, but it will be in a box for up to, or longer than a year, making the warranty useless.
- 4) There likely will be newer upgraded software and equipment available when we are installing last year's model. Not a good idea.

The Chief agreed, so for now, we are going to stand down until our MDC's have been installed in our patrol vehicles.

Thanks,

*Dan Cohen, Administrative Lieutenant
Santa Maria Police Department

Hi guys,

Just wanted to check in and see if the agreement was acceptable. Thanks!
